Akhilan Vengala

akhilanvengala9@gmail.com 9182242170 Hyderabad, Telangana

https://www.linkedin.com/in/akhilanvengala/ https://github.com/akhilan9

Profile

Highly motivated undergraduate in Information Technology with a strong academic record and interests in **Artificial Intelligence, Cybersecurity, and Distributed Systems**. Experienced in developing **AI-driven applications for multilingual speech transcription and translation** and actively engaged in **cybersecurity CTF challenges** involving **steganography, network traffic analysis, and web security testing**. Proficient in **Java, Python, JavaScript, and R**, with experience using **machine learning frameworks such as TensorFlow and Keras**, and development tools including **Flutter and Power BI**. Passionate about building **intelligent systems**, analyzing **complex data**, and contributing to **research-driven projects in advanced computing technologies**.

Research Interests

Artificial Intelligence, Cybersecurity, Data Science, IoT, Blockchain Technology, and Full-Stack Software Development.

Education

2023 – Present
Hyderabad, India

Vignana Bharathi Institute of Technology
B. Tech - Information Technology
CGPA: 9.0
Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Computer Networks, Operating Systems, Object-Oriented Programming, Web Development

2021 – 2023
Hyderabad, India

Narayana Junior College
MPC
Percentage: 93.6%

2020 – 2021
Hyderabad, India

The Mother's Integral School
SSC
CGPA: 10

Technical Skills

Programming Languages: Java, Python, C, JavaScript, R
Web & Backend Development: HTML, CSS, Node.js, Spring Boot
Mobile App Development: Flutter
Machine Learning / Data Science: TensorFlow, Keras, Pandas, Numpy, Matplotlib
Databases: MySQL, MongoDB
Data Analysis & Visualization: Power BI
Tools & Technologies: Git, GitHub, Docker, Streamlit, FFmpeg
Core Computer Science: Data Structures and Algorithms, Database Management Systems.

Projects

AI-Powered Multilingual Audio Transcription App
Developed an intelligent web-based application capable of converting speech into text in real time and translating it across multiple languages.
Technologies: Python, Streamlit, FFmpeg, OpenAI Whisper

Key Contributions:
• Built an audio processing pipeline for real-time speech recognition
• Integrated Whisper speech-to-text model for multilingual transcription
• Implemented translation functionality across multiple languages
• Designed a responsive web interface using Streamlit
• Enabled export formats including TXT, PDF, and SRT subtitles
Impact: Demonstrates practical integration of machine learning models into real-world applications that improve accessibility and multilingual communication.

Amazon Clone – E-commerce Front-End Website
Developed a responsive front-end replica of an e-commerce platform inspired by Amazon.
Key Contributions:
• Built responsive user interface components for multiple devices
• Implemented product listings and navigation features
• Developed interactive front-end features using JavaScript and DOM manipulation
Impact: Demonstrates strong understanding of front-end architecture and user interface design.

Cybersecurity & CTF Experience

Actively participated in cybersecurity challenges involving hidden data extraction, network traffic analysis, and web application security testing.
Activities:
• Solved steganography-based challenges involving hidden data embedded in images and files
• Performed packet analysis to identify network activity and potential vulnerabilities
• Practiced web application security testing and request interception
• Applied cryptographic tools to encrypt, decrypt, and analyze secured data
Tools Used: Wireshark (network packet analysis), Burp Suite (web application security testing), CryptoForge (cryptographic utilities), Snow (steganography tool)
Skills Developed: Network traffic analysis, web application vulnerability testing, cryptographic analysis, digital forensics and steganography investigation

Technical Activities

• Participated in cybersecurity CTF challenges and secured **1st prize**.
• Exploring machine learning frameworks such as TensorFlow and Keras
• Building experimental software projects to strengthen programming and system design skills
• Demonstrated IoT and software projects to school students
• Delivered a seminar on emerging technologies and encouraged innovation among young learners

Certificates

- Database Management Systems (NPTEL)
- JavaScript Essentials (Cisco Networking Academy)
- Keras and TensorFlow (Scaler)
- AI & Generative AI Basics (Microsoft)
- Google Crowdsource Hackathon
- Getting Started with AI (IBM SkillsBuild)
- Cybersecurity Hackathon
- Java Programming (Infosys Springboard)
- Python Full Stack Developer Virtual Internship (AICTE - EduSkills)

Languages

- English
- Telugu
- Hindi
